

I am paying for this service therefore, I don't believe that nabb should not tell me what I can listen to. XM radio has been wonderful due to the fact that they are offering me things that the regular radio stations will not offer me. The instant traffic and weather is great for us due to the fact that my husband and I are blind. We use paratransit and we can usually tell if our ride is going to be late due to traffic conditions. The weather is great due to the fact taht it is thee at the touch of a button. It is the same for cable and satellite TV which we also pay for. I have not been satisfied with regular TV programming and regular radio programming, therefore that is the main reason why I purchase these items. Do not take it away. If you do that where has my freedom of choice go?
